

## SELF-LUMINOUS TRITIUM EXIT SIGNS

*Ideal for hazardous, corrosive, or harsh environments, or where no electrical power source is available; these exits have no filament-type lamp to become hot or glow, which may cause ignition. Signs may be ordered with a 10, 15, or 20 year life.*

**MEETS BOCA, ICBO, AND SBCCI CODE REQUIREMENTS.**

### SPECIFICATIONS

**CONSTRUCTION:** High-impact, weather proof ABS thermoplastic with UV-stabilized clear polycarbonate diffuser panel.

**FINISH:** Please specify black or white housing. Face color is red or green.

**MOUNTING:** Universal mounting, ceiling, end wall, or back mounted; canopy supplied.

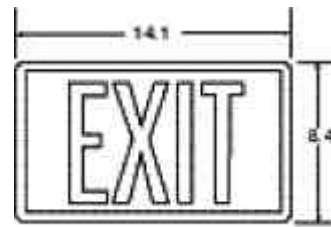

**PANEL:** 1 or 2 Stencil Face panels have red or green, 6" letters and removable Chevrons for universal application.

**ILLUMINATION:** SLT series signs are illuminated by borosilicate glass tubes that are internally coated with zinc phosphor and filled with tritium gas. The tritium excites the phosphor coating, thereby producing visible light. The operating life of the sign is determined by the amount of gas in the light tubes.

**LABELS:** U.L., E.T.L., or ENTELA Listed.

**WARRANTY:** See warranty page.
